

AI LEAD Act

S.2293, 118th

REPORTED OUT OF COMMITTEE

Sen. Peters (D-MI)
AI governance · U.S. Senate

HOW FAR IT WAS CARRIED

BACKGROUND

Federal AI accountability had no named owner inside agencies, so responsibility for a deployed system was distributed until it was nobody's. This bill assigns it: a Chief AI Officer in each agency, a council to coordinate them across government, and governance boards to review deployments rather than leaving them to individual programme offices.

KEY PROVISIONS

- Establishes a Chief AI Officer in each covered federal agency.
- Creates a Chief AI Officers Council to coordinate practice across agencies.
- Requires agency AI governance boards to review deployments.
- Assigns responsibility for agency AI risk management to a named official.
- Requires reporting on agency AI use and governance to Congress.

LEGISLATIVE RECORD

Reported out of committee 26 July 2023.
